

legacy Versioning auto generated code:

this is for developer and architect.
discussion of cashback upgrade lukumon.balogun@mtn.com made the point.

AC-19: legacy Versioning auto generated code: **DONE**

1	Author	Indranil Banerjee
2	IDE USED	intellij
3	Intended for	Developer and Architect

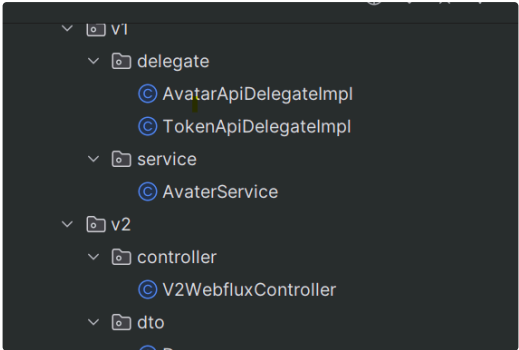

owner @indranil banerjee

Objective:

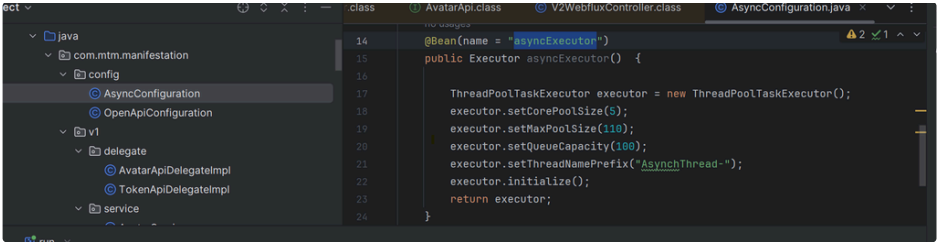

- there was a need for new API version for the reward management system with thread scheduler enabled.

Solution Approach:

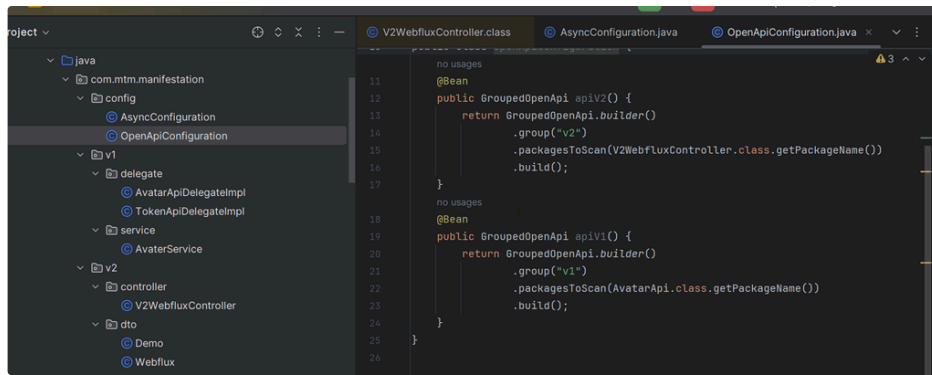

- in the auto generated API module create two folder structure.

- create one async config file.

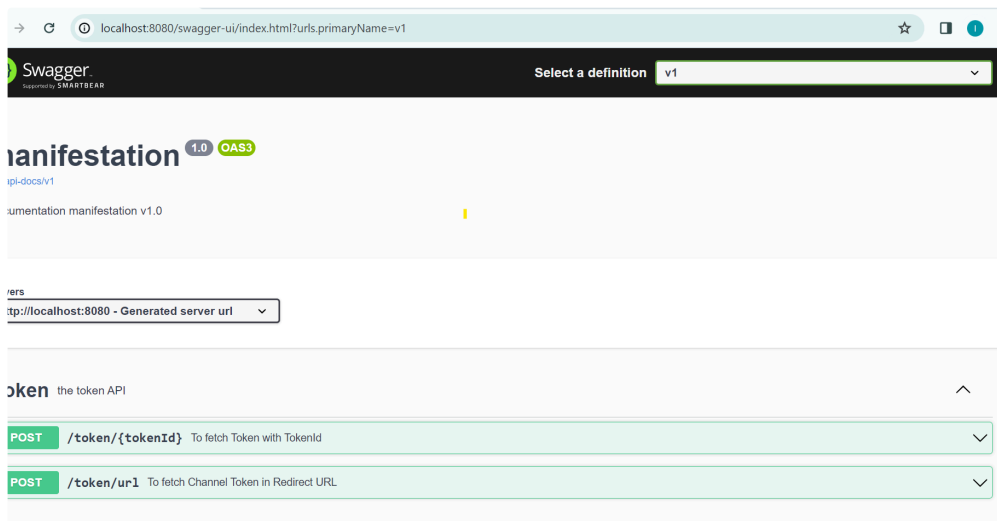

- create OPENAPI configuration.

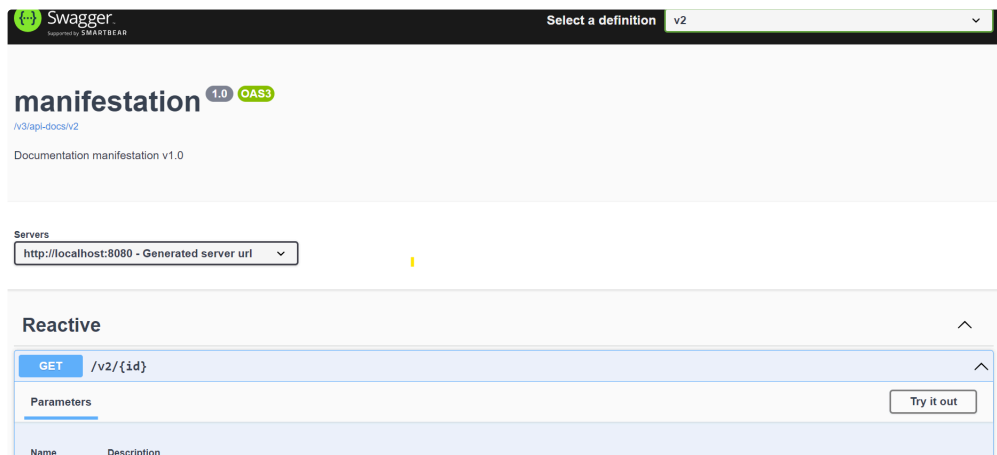

- Run the code.

Output Format:

- for version one

for version two:

- from there you can do the processing.

Source Code: [manifestation.zip](#)

Action Item:

- ☒ demo to chandrakanth.p@mtn.com
- ☐ chandrakanth.p@mtn.com to implement.
