# Scheduler Spring For Crowd Twist

> ℹ️ As per crowed twist configuration we have to create a scheduler as discussed with  @Taniya Biswas   Emmanuel.Eze@mtn.com

> ℹ️ author  @indranil banerjee

> ✅ Objective: is to create generic scheduler module which will work with anything.

**Solution Approach:**

Run this job for the corn expression.

```
no usages  new *
@Scheduled(fixedRate = 5000)
public void batchSchedular(){
    runJob(annotationConfigApplicationContext
    runJob(annotationConfigApplicationContext
}
```

This corn expression can be of **yearly** basis.
